

Bio:

Dr Tarryn Marisca Reddy (PhD) is an Audiologist and Vestibular Clinician specialising in advanced vestibular diagnostics and paediatric audiology. She served as a lecturer and Head of the Vestibular Clinic in the Department of Speech-Language Pathology and Audiology at the University of Pretoria. Dr Reddy is also in private practice in Johannesburg with a focus on comprehensive assessment and management of complex hearing and balance disorders. Her clinical work integrates advanced technologies including rotational chair testing, VNG, vHIT, and vestibular evoked myogenic potentials (VEMPs). Her research, published internationally, focuses on optimising vestibular diagnostic accuracy, and she is passionate about translating research innovation into practical clinical solutions.
